About Us

Kowa Optronics Co., Ltd. is part of Kowa Company, Ltd., one of the largest privately owned companies in Japan. Founded in 1894, Kowa produces a wide variety of products in a number of industries, including but not limited to healthcare, industrial, and energy conservation sectors.

Since 1946, Kowa has developed and manufactured high-end optical equipment such as CCTV and machine vision lenses, spotting scopes, handheld binoculars, and coin operated binoculars.

With over 70 years of technical experience, Kowa Optronics Co., Ltd. continues its tradition of being a leader in its industries by providing innovative solutions and new technologies to solve even the toughest vision system obstacles.

2" 50MEGAPIXEL 3.1 μ m

VM Series NEW

- ▶ Large image size of ϕ 32mm with M42-mount or TFL-mount.
- ▶ High quality lenses with a resolving power of 3.1 μ m.
- ▶ Suitable for 8K resolution and are rated at up to 50 megapixels for use with top performance cameras.

1.1" 24 MEGAPIXEL 2.5 μ m

FC24M Series NEW

- ▶ 2.5 μ m pixel pitch high resolution compact lens.
- ▶ High traceability by QR code management.
- ▶ Compatible with maximum 1.2inch format size.

1" 12 MEGAPIXEL IR-CORRECTED (VIS-SWIR) 3.1 μ m

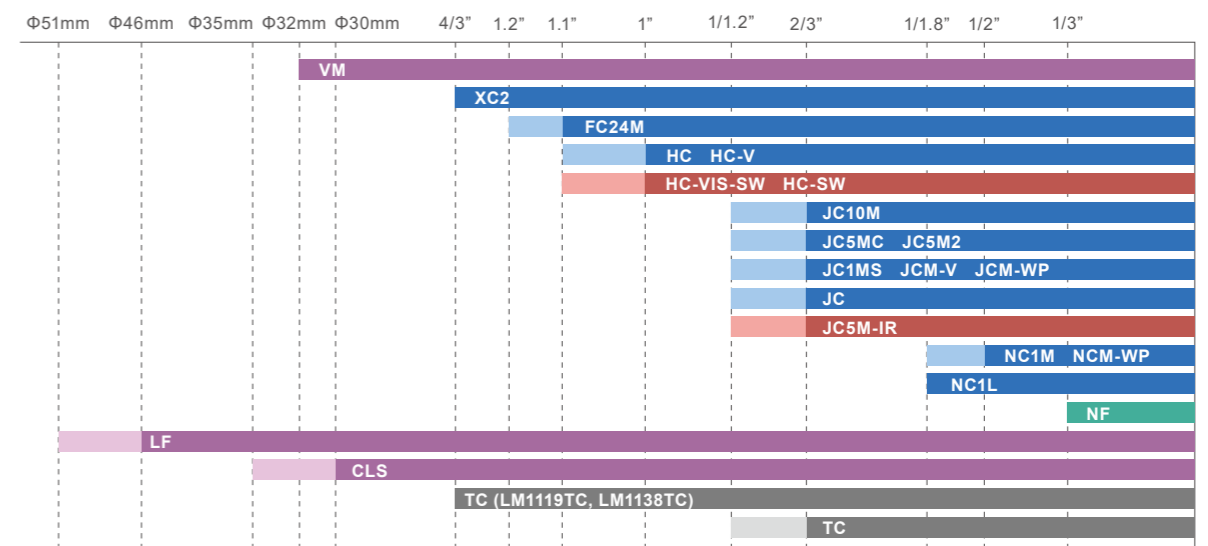

HC-VIS-SW Series NEW

- ▶ A maximum of 12 megapixel and 3.1 μ m performance can be found at select wavelength ranges.
- ▶ Virtually zero focus shift from visible to 2000nm wavelength range.

LM35VM42	◇	◇	✓	✓	✓	✓	✓	✓
LM35VM35	◇	◇	✓	✓	✓	✓	✓	✓

Features of VM Series

- ▶ Large image size of φ32mm with M42-mount or TFL-mount.
- ▶ High quality lenses with a resolving power of 3.1μm.
- ▶ Suitable for 8K resolution and are rated at up to 50 megapixels for use with top performance cameras.
- ▶ Kowa's new and innovative switch locking screw mechanism prevents thumb screws from falling off.
- ▶ The flange back distance can be modified by attaching optional mount adapters to convert to TFL-II or other formats.
- ▶ High magnification design with a focusing range as close as 0.1m away.

Optional Mount Adapters

The flange back can change by using optional mount adapters included with each lens.

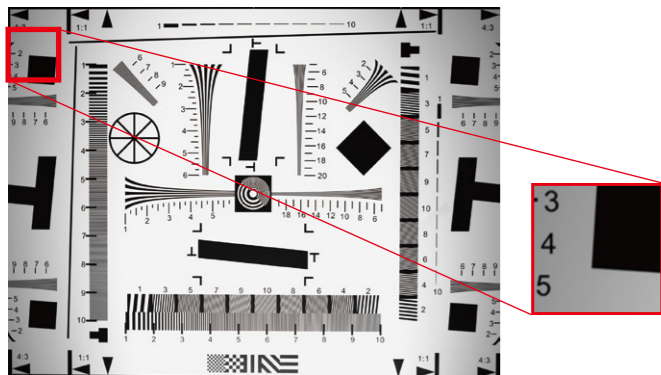

Standard : M42-mount has a 17.526mm flange back distance.

Series	Mount Adapter	Flange Back (mm)	Mount
VM42	FB-1600VM	16	M42 Mount
	FB-1148VM	11.48	M42 Mount
	FB-1000VM	10	M42 Mount
	FB-0656VM	6.56	M42 Mount
	FB-1750VM	17.5	TFL-II Mount

*Mount adapters do not work with VM35 series lenses.

High Resolution Image at the Corners (LM25VM).

Switch Locking Screw Mechanism Prevents Fatigue Failure of Thumb Screws

Kowa's VM series features a newly designed switch locking screw mechanism that prevents thumb screws from falling off by utilizing a fixing screw that does not rotate in a set position. The thumb screw locks into place by sliding the fixing screw to the right side. It can then be detached by sliding the fixing screw to the left side.

The thumb screw can detach by sliding the fixing screw to the left side.

Applications

- Line Scan
- FPD Inspection
- Aerial photography
- Drones

XC Series

High Resolution FA/MV Lenses

Features of XC Series

- ▶ Large image size of Φ23mm incorporated within a C-mount design.
- ▶ Megapixel resolution is maintained throughout the entire image even when the iris is fully opened.
- ▶ High precision aspherical lens greatly reduces distortion and produces a high-definition picture.
- ▶ The LM8XC generates a very wide 93.5° horizontal angle of view.
- ▶ Kowa's floating mechanism system virtually eliminates optical aberrations from close distance to infinity.

Magnification Using A Close Up Ring

You can use close up rings to increase the magnification and decrease the minimum object distance (M.O.D.) of the lens. Simply screw in the spacer ring between the threads of the lens mount and camera.

FC24M Series NEW

High Resolution FA/MV Lens

Features of FC24M Series

- ▶ 2.5 μ m pixel pitch high resolution compact lens.
- ▶ Compatible with maximum 1.2inch format size.
- ▶ Excellent corner brightness and low distortion.
- ▶ Kowa's floating mechanism system virtually eliminates optical aberrations from close distance to infinity.
- ▶ Kowa's wide-band multi-coating effectively decreases ghost and flare and produces a high transmission from the visible to NIR wavelength range.
- ▶ High traceability by QR code management.

HC-V Series

High Resolution FA/MV Lenses

Kowa's new HC-V series is made for use in high vibration and shock environments. With a design based on Kowa's standard 1" HC lenses, this new ruggedized megapixel lens series is ideal for applications that require increased durability and high optical performance.

✓ Compatible ◊ Suitable ✗ Incompatible

Features of HC-V Series

- ▶ Up to 5 megapixels performance
- ▶ Unique mechanical design to guard against strong vibration and shock.
- ▶ Two way reversible nut is utilized instead of thumb screws in order to tightly lock the focus adjustment ring in place.
- ▶ Utilizing two way reversible nut contributes to the prevention of screw dropping troubles.
- ▶ All internal glass elements are glued to the inside housing to improve stability.
- ▶ Interchangeable iris plates are used to select the F-stop.

Interchangeable Iris Plates

- The HC-V series uses interchangeable iris plates instead of mechanical iris diaphragms with moving blades. You can choose from four iris plates to adjust the F-stop.

Interchangeable Iris Plates

Focus Adjustment Procedure

- Unscrew the bottom ring of the outside body to adjust the focus to optimal position.
- Screw the red two way reversible nut on the center body towards the bottom ring to lock in the focus.

Two Way Reversible Nut

Features of JC10M Series

- ▶ 200lp/mm center resolution and low distortion maximize performance of high-end inspection.
- ▶ Incorporating Kowa's wide-band multi-coating and floating mechanism system, the JC10M lens series greatly reduces chromatic aberration from close distance to infinity and maintains a high transmission from visible to NIR.
- ▶ Short minimum object distance and compact design using aspherical lenses (5 models/f=5~25mm) allow for easy installation in compact machine vision systems.

JC5M2 Series

Features of JC5M2 Series

- ▶ Incorporating Kowa's floating mechanism system, the JC5M2 lens series greatly reduces chromatic aberration from close distance to infinity.
- ▶ Good performance at the edge as well as the center.
- ▶ Available in F1.4. (LM12JC5M2 and LM16-JC5M2)

Features of JC5MC Series

- ▶ One of the industry's smallest and lightest 5 megapixel lenses.
- ▶ Roughly half the size of Kowa's current 2/3" 5MP JC5M2 series lenses.
- ▶ Unique mechanical design to guard against strong vibration and shock.
- ▶ Easy to change the iris to the marked F-number by click-type iris mechanism. (F2.8, 4, 5.6, 8 and 16)
- ▶ Focal length 35mm and 50mm : To Be Released in 2021

NCM/JCM Series

High Resolution FA/MV Lenses

Features of WIDE NCM/JCM Series

- ▶ Super wide optical design
 - ▶ Large angle of view
 - ▶ Expansion angle
(Horizontal angle 82degree, Vertical angle 66degree)
- † 2/3" model: LM5JCM, 1/1.8" model: LM3NCM

Low distortion

- ▶ Reduces the distortion to corner
- † LM5JCM: Under 0.5%, LM3NCM: Under 0.4% (TV distortion)

High quality

- ▶ Adapts to 2 megapixel cameras
- ▶ Improves center and corner resolution
- ▶ High transmittance

JCM-V Series

High Resolution FA/MV Lenses

Kowa's new JCM-V Series is designed for use in high vibration and shock environments. With a design based on Kowa's standard 2/3" JC1MS lenses, this new ruggedized megapixel lens series is ideal for applications that require increased durability and high optical performance.

Features of JCM-V Series

- ▶ Equivalent to 2 megapixels performance
- ▶ Two way reversible nut is utilized instead of thumb screws in order to tightly lock the focus adjustment ring in place.
- ▶ Utilizing two way reversible nut contributes to the prevention of screw dropping troubles.

- ▶ Interchangeable iris plates are used to select the F-stop.
- ▶ Unique mechanical design to guard against strong vibration and shock.
- ▶ All internal glass elements are glued to the inside housing to improve stability.

Interchangeable Iris Plates

- The JCM-V series uses interchangeable iris plates instead of mechanical iris diaphragms with moving blades. You can choose from four iris plates to adjust the F-stop.

Interchangeable Iris Plates

Focus Adjustment Procedure

- Unscrew the bottom ring of the outside body to adjust the focus to optimal position.
- Screw the red two way reversible nut on the center body towards the bottom ring to lock in the focus.

Instruction Video

Two Way Reversible Nut

JCM-WP Series

High Resolution FA/MV Lenses

The JCM-WP series is a water and dust resistant high-resolution lens with a design based on Kowa's ruggedized megapixel JCM-V lenses.

*Performance may not be secured depending on environment and condition to be used.

*Not intended for underwater use.

*Refer to the instructions and our web page for more information.

Features of JCM-WP Series

- ▶ Water repellency and easy cleaning of the front lens surface by applying Kowa's special coating.
- ▶ Two way reversible nut is utilized instead of thumb screws in order to tightly lock the focus adjustment ring in place.
- ▶ Utilizing two way reversible nut contributes to the prevention of screw dropping troubles.
- ▶ Interchangeable iris plates are used to select the F-stop.
- ▶ All internal glass elements are glued to the inside housing to improve stability.
- ▶ Equivalent to 2 megapixels performance

Interchangeable Iris Plates

- 1 The JCM-WP series uses interchangeable iris plates instead of mechanical iris diaphragms with moving blades. You can choose from four iris plates to adjust the F-stop.

Focus Adjustment Procedure

- 2 Unscrew the bottom ring of the outside body to adjust the focus to optimal position.
- 3 Screw the red two way reversible nut on the center body towards the bottom ring to lock in the focus.

HC-VIS-SW Series NEW

Features of HC-VIS-SW Series

- ▶ A maximum of 12 megapixel and 3.1 μ m performance can be found at select wavelength ranges.
- ▶ Virtually zero focus shift from visible to 2000nm wavelength range.
- ▶ Utilizes ultra wideband multi-coatings to increase transmission.
- ▶ Special extra low dispersion (XD) glass significantly reduces chromatic aberration, otherwise known as color fringing.
- ▶ Focal length 8mm, 16mm and 35mm : To Be Released in 2021

Design of IR-Corrected Lenses

In addition to having high transmission, Kowa's HC-VIS-SW series is IR-Corrected. The primary benefit for IR-Correction is that it allows an image to remain in focus even when the wavelength changes from visible to infrared or vice versa. With a standard visible, NIR or SWIR lens, a focus shift will occur due to differences in the refractive index if the wavelength fluctuates. However, by incorporating extra low dispersion (XD) glass and carefully aligning all internal lens elements, such focus shift problems are eliminated.

Example of Focus Shift

* Focusing at 1650nm

HC-SW Series

- ▶ Incorporating Kowa's special coating technology, the 1" format HC-SW series will maintains high transmission from 800nm to 1900nm.
- ▶ Designed for Near Infrared(NIR) and Short Wavelength Infrared (SWIR) applications.

TELECENTRIC Series

High Resolution Lenses

Features of TC Series

- ▶ Produces high contrast and resolution in both the center and corners.
- ▶ Virtually no TV distortion of entire image area.

Telecentric Optical System

In a telecentric optical system, there is no change in magnification when focusing. Thus, the magnification remains constant at different working distances. Similarly, the movement of an object also does not change the magnification, which makes a telecentric lens ideal for measuring objects with high accuracy.

In a telecentric optical system, the chief rays are parallel to the optical axis. As a result, the aperture becomes greater as the magnification is fixed by the focusing rays. This means that the F-number on a telecentric lens tends to be larger when compared to a standard megapixel lens.

Application Examples

- ▶ Surface inspection of silicon wafers
- ▶ Image defect inspections
- ▶ Inspection of dirt on prisms and glass circuit boards
- ▶ Measurement of thread pitches
- ▶ Reading 2D codes

2/3" TELECENTRIC 5 MEGAPIXEL PLUS

- ▶ Telecentric lens with variable magnification
- ▶ Able to adjust the magnification to match with the pixel size of the camera
- ▶ Lenses are designed with an optical magnification that is ideal for over 5 megapixels
- ▶ Distortion free lenses of less than 0.02%. TV distortion is limited to 0.25% on the entire image area even when used with a 5 megapixel camera

JC5MCseries

LM8JC5MC

Table with columns: WD, Magnification, Fields of View (mm) for 2/3", 1/1.8", and 1/2". Rows include magnification values from 0.008 to 0.051.

LM16JC5MC

Table with columns: WD, Magnification, Fields of View (mm) for 2/3", 1/1.8", and 1/2". Rows include magnification values from 0.016 to 0.080.

NCM/JC1MSseries

JC3NCM

Table with columns: WD, Magnification, Fields of View (mm) for 1/1.8", 1/2", and 1/3". Rows include magnification values from 0.00360 to 0.03210.

LM6NCM

Table with columns: WD, Magnification, Fields of View (mm) for 1/1.8", 1/2", and 1/3". Rows include magnification values from 0.00600 to 0.05380.

LM12JC5MC

Table with columns: WD, Magnification, Fields of View (mm) for 2/3", 1/1.8", and 1/2". Rows include magnification values from 0.012 to 0.057.

LM25JC5MC

Table with columns: WD, Magnification, Fields of View (mm) for 2/3", 1/1.8", and 1/2". Rows include magnification values from 0.025 to 0.120.

LM4NCM

Table with columns: WD, Magnification, Fields of View (mm) for 1/1.8", 1/2", and 1/3". Rows include magnification values from 0.00450 to 0.03900.

LM5JCM

Table with columns: WD, Magnification, Fields of View (mm) for 2/3", 1/1.8", and 1/2". Rows include magnification values from 0.00490 to 0.04440.

LM8JC1MS

Table with columns: WD, Magnification, Fields of View (mm) for 2/3", 1/1.8", and 1/2". Rows include magnification values from 0.00820 to 0.07450.

LM16JC1MS

Table with columns: WD, Magnification, Fields of View (mm) for 2/3", 1/1.8", and 1/2". Rows include magnification values from 0.01640 to 0.07870.

LM35JC1MS

Table with columns: WD, Magnification, Fields of View (mm) for 2/3", 1/1.8", and 1/2". Rows include magnification values from 0.03540 to 0.18350.

LM75JC1MS

Table with columns: WD, Magnification, Fields of View (mm) for 2/3", 1/1.8", and 1/2". Rows include magnification values from 0.03880 to 0.06620.

LM12JC1MS

Table with columns: WD, Magnification, Fields of View (mm) for 2/3", 1/1.8", and 1/2". Rows include magnification values from 0.01260 to 0.07960.

LM25JC1MS

Table with columns: WD, Magnification, Fields of View (mm) for 2/3", 1/1.8", and 1/2". Rows include magnification values from 0.02540 to 0.12460.

LM50JC1MS

Table with columns: WD, Magnification, Fields of View (mm) for 2/3", 1/1.8", and 1/2". Rows include magnification values from 0.05360 to 0.30100.

LM100JC1MS

Table with columns: WD, Magnification, Fields of View (mm) for 2/3", 1/1.8", and 1/2". Rows include magnification values from 0.03430 to 0.05220.

Various types of lenses are used in machine vision systems. In order to achieve the highest performance, it is important to select the lens most suitable for the application.

Product Number Breakdown Ex. **LM 12 JCM**

- ① Represents lens function
- ② Represents focal length (fixed focal length lenses)
- ③ Represents format sizes and lens type

- LM.....KOWA CCTV lenses
- LMZ.....KOWA Zoom lenses
- LMVZ.....KOWA Varifocal lenses
- XC.....4/3 inch format megapixel lens
- CLS.....3CCD color line scan lens
- SC,HC.....1 inch format megapixel lens
- HC-SW.....1 inch format SWIR lens
- JC.....2/3 inch format lens
- JCM.....2/3 inch format megapixel lens
- NCL.....1/2 inch format lens
- NCM.....1/2 inch format megapixel lens
- M.....Macro lens
- TC.....Telecentric lens
- NC3.....1/2 inch format 3CCD megapixel lens
- IR.....IR-corrected lens
- NF.....NF mount lens

Quick selection - How to calculate focal length

Ex) A 2/3" camera is used to capture an object 100mm wide from a distance of 300mm. Use the picture below and the image size chart to substitute for Y, L, and Y'. Then, to capture the entire object, use the formula $f=L*Y'/Y$ to calculate focal length.

$Y=8.8\text{mm}$ (See image size chart), $L=300\text{mm}$, $Y=100\text{mm}$
 $f=300*8.8/100$
 $f=26.4\text{mm}$

The most appropriate lens is f=25mm lens, which is close but not greater than the 26.4 derived from the calculation. Lenses with shorter focal lengths than the given number can capture an object in its entirety.

Quick selection - How to calculate the angle of view

Ex) A 1/2" camera is used to shoot an object 300mm away. The focal length of the lens is 16mm. Use the picture below and image size chart to substitute for f, L, and Y1 (H or V accordingly). Then to calculate the angle of view, use the formula $Y=L*Y'/f$.

Width- $Y=6.4\text{mm}$ (Horizontal), $f=16\text{mm}$, $L=300\text{mm}$
 $Y=300*6.4/16$
 $Y=120\text{mm}$
 Vertical- $Y=4.8\text{mm}$ (Vertical), $f=16\text{mm}$, $L=300\text{mm}$
 $Y=300*4.8/16$
 $Y=90\text{mm}$

Thus in order to capture the object in its entirety, the maximum dimensions of an object at a distance of 300mm is 120mm wide and 90mm height.

<Characteristics of lenses are described below>

- Object size..... Field range which can be captured by the image sensor
- Image size..... See description
- Object distance Distance from the lens to the object
- Focal length..... Distance from the principal point to the focus point
- Angle of view..... This angle represents a shooting range in degrees. The shorter a focal length is, the bigger an angle of view is.
- Principal point..... Optical center of the lens

Image size

Image size represents size of camera sensor

Camera	Hor.(mm)	Ver.(mm)	Dia.(mm)
1/4inch	3.6	2.7	4.5
1/3inch	4.8	3.6	6
1/2inch	6.4	4.8	8
1/1.8inch	7.2	5.4	9
2/3inch	8.8	6.6	11
1inch	12.8	9.6	16
1.1inch	14.1	10.6	17.6
1.2inch	15.4	11.5	19.2
4/3inch	18.4	13.8	23
APS-C	22.3	16.7	27.9
2@32)inch	25.6	19.2	32

F-number

The F-number represents the amount of light that passes through a lens. As the F-number decreases, the amount of light that passes through the lens increases. The F-number affects the depth of field as mentioned below.

Depth of field

Depth of field is the range of distance, in front of and behind a subject that appears in focus. If the depth of field is deep, an object will appear to be in focus even if it moves slightly back and forth.

The characteristics of depth of field (comparing lenses with the same specifications)

- Increasing the F-number (darker) increases the depth.
- Shortening the focal length increases the depth.
- Lengthening the object distance increases the depth.

Floating Mechanism system

The floating mechanism system is effective in preventing malfunction and increasing the life of the lens. It is also called the close distance aberration compensation mechanism.

In standard CCTV lenses, the whole or a part of the lens moves when focusing. However, moving one lens element and not the entire lens system changes the direction of the light rays and decreases the optical performance.

However, lenses with the floating mechanism system can vary the distance between the lens elements. This enables the lens to achieve the highest performance at various objective distances.

Lens processing facility

Kowa has the facility to manufacture any optical device with the requested specifications.

Examples of optical devices

- Parabolic mirrors
- Plastic molded lenses
- Germanium lenses
- Special filters
- Aspherical Lenses

Coating machine

Spectrophotometer

Spherical and Aspherical lenses

YAG laser cut optical devices

Special mirrors

Various prisms

Optical devices with special coatings

Ultra-precision optical devices

Design & Development

OEM Product Design

Kowa has the ability to create an OEM customized optical system, which includes the optical, mechanical, electrical and software design. We will provide you the best solution for every customer who requires high-end customized products.

Example of Customized Optics

- Optics for Medical X-ray diagnostics
- Optics for Semiconductor instruments
- Optics for laser scanning applications
- Optics for surveillance applications
- Optics for printing applications

Kowa will provide suggestions about the customized optics based on the flow chart below.
